

HOW WE OPERATE

Our Health/Safety/Risk Management Service offers various programs customized to each district's unique needs. Our service is designed to meet your district's needs in one of two ways, through an itinerant staff person who is located in your district and acts as your in-house safety specialist, or through a consultant staff person who is available to assist and advise your staff on an "as needed" basis. While only one BOCES Risk Management professional may be assigned to your district, there is an entire team behind him or her if the need arises.
